Don't Be Scared – The Treats of Government Accounting October 31, 2024

Traditional

Assets = Liabilities + "Residual Resources"

or

Assets – Liabilities = "Residual Resources"

Government

Assets + Deferred Outflows of Resources = Liabilities + Deferred Inflows of Resources + Net Position/Fund Balance

or

Assets + Deferred Outflows of Resources - Liabilities - Deferred Inflows of Resources = Net Position/Fund Balance

What is a Deferred Outflow of Resources?

- Outflow of resources
 - Consumption of net assets* applicable to the current or earlier period
 - Net Assets = Total assets minus total liabilities
- Deferred outflow of resources
 - Consumption of net assets applicable to a future period
 - Example: Grant payments where only the time requirement is not met
 - Debit on statement of financial position rather than debit on statement of resource flows
 - Delays recognition of outflow
- * Net assets does *not* equal net position, as the latter includes the effects of deferred resource flows

What is a Deferred Inflow of Resources?

Inflow of resources

- Acquisition of net assets applicable to the current or earlier period
- Deferred inflow of resources
 - Acquisition of net assets applicable to a future period
 - Example: Grant receipts where only the time requirement is not met
 - Credit on statement of financial position rather than credit on statement of resource flows
 - Delays recognition of inflow

Unique Features of Governmental Accounting

- Fund accounting focus on accountability over dedicated resources
- More than one measurement focus
 - Business-type operations
 - Governmental operations
- Two "levels" of reporting
 - Government-wide
 - Fund
- Budgetary reporting

Unique Features of Governmental Accounting

- Different financial objectives for different types of operations
 - Governmental (taxes and grants)
 - Business-type (fees and charges)
- Ultimate goal of accounting demonstrate accountability

Governmental Operations

Model

- Use taxing power to raise resources, as needed, to provide services
- No relationship between what an individual pays and receives
- Primarily supported by taxes, grants, and similar revenue sources
- Key environmental factor
 - Resources can be generated through future taxes as well
- Financial objective
 - Ensure that existing resources plus revenues are sufficient to cover nearterm outflows
 - Near-term outflows = expenditures
 - Focus on providing information useful for making budgetary decisions and demonstrating budgetary accountability

Business-Type Operations

Model

- Generate revenues by providing goods and services to customers
- Relationship between what an individual pays and receives
- Primarily supported by fees and charges
- Key environmental factor
 - Point of sale provides unique opportunity for generating revenue
- Financial reporting objectives
 - Demonstrate accountability
 - Demonstrate whether revenues generated from customers are sufficient to cover the cost
 of the related goods and services, regardless of when the related bills are paid
 - ► Cost = expense
- Public sector
 - Revenues may only partially recover cost
 - An activity may be subsidized to promote the public good

Fund Accounting

Official definition

- Accounting entity with a set of self-balancing accounts that record cash and other financial resources together with their related liabilities and residual balances, and their changes. They are segregated for the purpose of carrying out specific activities or attaining certain objectives. (NCGA Statement 1)
- Limitations on resource use
 - Ensures compliance (accounting)
 - Demonstrates compliance (financial reporting)
- Practical necessity to accommodate differences in measurement focus

Three Categories of Funds in Government

Governmental funds

- Generally used for tax- and grant-supported activities
- Proprietary funds
 - Used to report business-type activities
- Fiduciary funds
 - Resources held in a trustee or custodial capacity
 - Belong to others outside of the government, and can't be used to support the government's own activities

Fund Types: Governmental Funds

- General fund Government's main operating fund
- Special revenue funds Specific revenue sources restricted or committed to specific uses, other than for debt service or capital projects
 - Examples: grants; motor fuel tax
- Debt service funds Account for the repayment of debt
- Capital projects funds Account for resources used for all, or the most significant capital acquisitions, and construction and development projects
- Permanent funds Resources restricted to being invested for income and principal amounts cannot be spent
 - Example: Endowments

Fund Types: Proprietary Funds

- Enterprise funds Accounts for services provided on a full or partial cost-recovery basis to parties outside of the government
 - Cost recovery through fees and charges
 - Cost may be subsidized for public good
 - Examples: Mass transit; utilities; public stadium; golf course
- Internal service funds Normally used to allocate certain costs to other funds or departments within the government on a costreimbursement basis
 - Cost-reimbursement basis through fees and charges
 - Should break even over time
 - Examples: Motor pool; data processing; IT; risk management

Fund Types: Fiduciary Funds

• Trust funds

- Pension and other postemployment benefits trust funds
- Investment trust funds
- Private-purpose trust funds
- Custodial funds

Measurement Focus and Basis of Accounting

- Business-type operations
 - Economic resources measurement focus
 - All assets, liabilities, and deferred outflows/inflows of resources
 - Difference = net position
 - All changes in economic position during the period affecting net position
 - Accrual basis of accounting
- Governmental operations
 - Current financial resources measurement focus
 - Only assets, liabilities, and deferred outflows/inflows of resources relevant to near-term liquidity
 - Difference = fund balance
 - Only changes in financial position during the period affecting fund balance
 - Modified accrual basis of accounting

Basis of Accounting

Accrual

- Transactions and events are recognized when they occur, regardless of when cash is received or disbursed
- Recognize revenue when earned and measurable
- Recognize expense when liability is incurred

Modified Accrual

- Starting point = Accrual
 - When the underlying transaction or event occurs
- Modify when specifically required in GAAP – only to the extent that near-term liquidity is affected
 - Revenue recognized only if available to make payments soon after year-end
 - Expenditures recognized only if payments normally are made during the period or soon after year-end
- Practical result
 - Less aggressive recognition than accrual basis
 - More aggressive recognition than cash basis

Measurement Focus and Basis of Accounting Application

Economic resources measurement focus + accrual basis of accounting

- Government-wide financial statements
- Proprietary fund financial statements
- Fiduciary fund financial statements

Current financial resources measurement focus + modified accrual basis of accounting

Governmental fund financial statements

Key Differences

Four major differences between a statement of resource flows presented using the economic resources measurement focus and a statement of resource flows presented using the current financial resources measurement focus that involve the way the following are reported:

- 1. Issuance of long-term debt
- 2. Repayment of principal of long-term debt
- 3. Capital outlay
- 4. Consumption of capital assets

1. Issuance of Long-Term Debt

Economic resources? No

| | DR | CR |
|--|-------|-------|
| Cash | \$100 | |
| Bonds payable | | \$100 |
| (Issuance of long-term debt) | | |
| Current financial resources? Yes | | |
| | DR | CR |
| Cash | \$100 | |
| Other financing source – bond issuance | | \$100 |
| (Issuance of long-term debt) | | |

2. Repayment of Principal on Long-Term Debt

Net effect on statement of financial position?

Economic resources? No

| | DK | |
|--|-------|-------|
| Bonds payable | \$100 | |
| Cash | | \$100 |
| (Repayment of principal of long-term debt) | | |
| Current financial resources? Yes | | |
| | DR | CR |
| Expenditures – debt service principal | \$100 | |
| Cash | | \$100 |
| (Repayment of principal of long-term debt) | | |

DR

CP

3. Capital Outlay

Net effect on statement of financial position?

Economic resources? No

| | DR | CR |
|--|-------|-------|
| Equipment | \$100 | |
| Cash | | \$100 |
| (Purchase of equipment) | | |
| Current financial resources? Yes | DR | CR |
| Expenditures – capital outlay | \$100 | |
| Cash | | \$100 |
| (Purchase of equipment) | | |

4. Consumption of Capital Assets

Economic resources? Yes

| | DR | CR |
|-----------------------------|------|------|
| Expense – depreciation | \$10 | |
| Accumulated depreciation | | \$10 |
| (Depreciation of equipment) | | |

- Current financial resources? No
 - The outflow was recognized when the asset was purchased (prior slide, bottom entry)

Report on statement of resource flows?

| ltem | Economic resources? | Current financial resources? |
|--|---------------------|------------------------------|
| Issuance of long-term debt | No | Yes |
| Repayment of the principal of long- term debt | No | Yes |
| Capital outlay | No | Yes |
| Depreciation/amortization | Yes | No |

Net Effect on Resource Flows Over Time

| ltem | Economic resources? | Current financial resources? |
|--|---------------------|---------------------------------|
| Debt Issuance: | | |
| Issuance of long-term debt | \$0 | \$100 |
| Repayment of the principal of long-term debt | \$0 | (\$100) |
| Net Effect: | \$0 | \$0 |
| Capital outlays: | | |
| Capital outlay | \$0 | (\$100) |
| Depreciation/amortization | (\$100) | \$0 |
| Net effect: | (\$100) | (\$100) |
| Net effect – overall | (\$100) | (\$100) |

Why Are Governmental Funds Different?

- g information useful for making budgetary
- Focus is on providing information useful for making budgetary decisions
 - Balanced budget = Focus on near-term liquidity
 - Will existing resources + inflows be sufficient to cover outflows?

How Much is Available to Spend? Fund Balance vs. Net Position

Fund Balance

- Five categories
- Basis for categorization
 - Constraints on how existing resources of the fund can be spent
 - The sources of those constraints
- Presented from most constraining to least constraining
 - 1. Nonspendable
 - 2. Restricted
 - 3. Committed
 - 4. Assigned
 - 5. Unassigned

Unrestricted

Net Position

- Three categories
- Classification based on accessibility
- Presented from most restricted to least restricted
 - 1. Net investment in capital assets
 - 2. Restricted
 - 3. Unrestricted

Financial Statements

Government-wide Financial Reporting

• Fund statements

- Focus is on financial accountability
 - Detail needed
 - Often short-term
- Government-wide financial statements
 - Focus is on operational accountability
 - "Big picture"
 - ► Long-term

| | | | | | | | | | | | | |

Government-wide Statements

- Statement of net position
- Statement of activities
 - Expenses presented before revenues
 - Reflects public-sector focus on service rather than profit
 - Focus on net program cost
 - Expenses matched against "program revenue" to demonstrate the degree to which the program is self-financing

Budgetary Reporting

Budgetary Reporting for Governments

- Always required in conjunction with basic financial statements
 - General fund
 - Major special revenue funds
- Additional requirements for governments that prepare an annual comprehensive financial report (ACFR)
 - All governmental funds with an annual (or biennial) appropriated budget

Example Budgetary Comparison Schedule

NAME OF GOVERNMENT
